Efficient AC motor guarantees reliability and a optimized motor design provides for low noise levels. Temperature sensor ensure long motor life.

Electro magnetic brake

Increased brake torque and brake stability by electromagnetic load wheel brake.

State-of-the-art Hydraulic System

The latest large-capacity hydraulic system reacts quickly during operation and the low noise control valve increases both efficiency and durability.

ZAPI AC Controller

The 8kHz(high frequency) ZAPI AC controller ensures optimal performance with less energy. Also, it protects the system from overheating and abnormal voltage.

Excellent Lift speed & Travel speed

The combination of the ZAPI AC controller, drive moter, and pump motor maximizes the work efficiency in logistics.

Function to increase work efficiency

- ① Vehicle performance optimized for working condition** : This function optimizes the performance of vehicle for the purpose of work, such as speed of operation, maximum working time and operator's proficiency.
- H (High) mode N (Normal) mode E (Economic) mode
- ② Tutle mode** : When selecting the turtle mode while working in narrow and congested workplace, the travel speed is reduced at a preset speed.

Comfortable Operator Environment

A practically designed full suspension seat is fully adjustable for optimum operating position, reducing operating fatigue.

*Fabric seat (STD), PVC seat (optional)

Comfortable suspension seat

An attractive and adjustable seat, based on a human engineering design, provides great comfort. Also, the angle of the armrest can be adjusted to reduce the fatigue of the driver.

- Grammer Seat
- Adjustable suspension stiffness based on the driver's weight (45~170kg)
- ELR type seat belt standard
- Heater and Backrest extension (OPT)

FWD/REV Switch & Fingertip control

The forward/reverse switch provides the operator with precise and smooth directional control. And responsive fingertips with less energy offer productivity improvement and safety. So the driver can feel less fatigue.

Break pedal

Smoother breaking is assured by the balanced design of the pedal and maintenance costs are lowered as the cover is easily replaceable.

Advanced LCD Monitor

The LCD color monitor with 3.5 inch graphic smart display allows the operator to easily and efficiently control the machine. The monitor provides information about speed & accelerator level, steer angle & travel direction, battery discharge indicator, hour meter & working mode. The operator can select various performance modes to meet all working conditions. Multilanguage (maximum 12) is available.

Load weight indicator (OPT)

When lifting a load, a change in hydraulic pressure of the lift line is converted to a measurement of weight displayed in real time, and a warning is given at the time of overload.

Auto tilt leveling (OPT)

Mounting the angle sensor on the back side of carriage enable operator to easily operate the vehicle by maintaining a level of the fork and ground.

Height indicator (OPT)

Mounting the height indicator on the side of mast will increase safety and convenience by displaying the height of fork on the LCD monitor in real time.

Secure & Safety

Excellent visibility Reliable safety

Interior space and strengthened safety device are designed with safety as the priority, thus enable the operator to focus on work safely and conveniently.

Some of the photos may include optional equipment.

Excellent visibility for safe operation

Optimized lift cylinder arrangement provides operator with wider visibility.

Some of the photos may include optional equipment.

Non slip floor mat

A heavy, vibration dampening, non-slip floor mat reduces operator fatigue and allows for increased productivity.

Strong overhead guard

The safety overhead guard meets ISO 6055 and ANSI regulations and protects the operator during hazardous work.

Headrest cushion pad

A large and soft cushion pad is positioned for operator's safety and comfort.

Safety features

The adoption of a high-sensitivity sensor and advanced safety system can prevent the safety accidents.

Curve control

Curve control limits travel speed based on turning radius for a smooth, precise turning operation for the driver.

Fork safety features

When the forks are being lowered, a down-control valve maintains the controlled speed. The down-safety valve prevents forks from dropping down in case of sudden damage of hydraulic line.

Anti roll back system

Anti Roll-back system offers protection against the machine rolling back on a ramp in combination with exceptional ramp start capabilities.

Automatic center position at starting

When the key ON, prox switch detects the position of drive wheel, and the wheel turns to the center position automatically.

Steering angle sensing system

The symbol of the cluster shows the angle of the steering wheel. So the operator can easily predict the direction of the vehicle.

Maintenance & Convenience

Durability, Easy Maintenance

An ideal arrangement of components ensures easy access and convenience for maintenance.

Some of the photos may include optional equipment.

Durability, Easy Maintenance

An ideal arrangement of component parts ensures easy access and convenience for maintenance.

Some of the photos may include optional equipment.

DC-DC Converter

DC-DC converter satisfied with UL & CE prevents from short circuit overload and reverse polarity.

Easy maintenance

The rotating hood with hinges can be opened up to 105 degrees. So the operator can check and repair the driving device located underneath the seat.

Easy battery replacement

By using the reach out function of the reach cylinder, the battery can be removed, checked, and exchanged easily.

Reliable MOSFET type controller

The self-diagnosis function of the controller allows operator to check the fault diagnosis and errors. Also, IP65 controller prevents the entry of water and dust completely.

Centralized fuse box

The centralized fuses ensure easy inspection and replacement.

Battery disconnect lever

The battery disconnect lever with large handle helps separate the battery connector from the vehicle.

Emergency switch

In case of an emergency, the emergency switch is installed to block the battery power supplied to the vehicle to prevent damage and safety accidents.

Hydraulic Filter
